

HEALTHY CAMP GUIDELINES

To promote a healthy camp experience and minimize the likelihood of disease transmission, **MIRACLE BIBLE CAMP** has adopted the following guidelines in cooperation with the requirements of the Minnesota Department of Health:

- Temps are taken each morning of youth camps before cabin groups mix. Family camps and retreat groups are expected to monitor temps themselves.
- Most activities are organized by cabin group (cohorts).
- Most meals are eaten outside in our patio area.
- Most chapels are held in our spacious new tabernacle tent.
- It is recommended by the CDC that unvaccinated people, those with pre-existing conditions, or those with compromised immune systems wear masks in indoor public spaces. This responsibility is left to the individual.

Before arrival at camp please conduct the following Visitor and Employee Health Screening Checklist:

Have you had any of the following symptoms since your last day at work or the last time you were here that you cannot attribute to another health condition?

- Fever (100.4°F or higher), or feeling feverish?
- Chills?
- A new cough?
- Shortness of breath?
- A new sore throat?
- New muscle aches?
- New headache?
- New loss of smell or taste?

If these conditions are noticed, please contact camp.

If these conditions develop while at camp, please notify your counselor and the camp office at once; avoid unnecessary contact with others while doing so.
